Academic Positions

02/2022 - present	**Postdoctoral Researcher**	*Lamont-Doherty Earth Observatory, Columbia University*
09/2021 - 01/2022	**Postdoctoral Researcher**	*Massachusetts Institute of Technology*
2016 - 2021	**Research/Teaching assistant**	*Massachusetts Institute of Technology*

Ph.D. Thesis: Analyzing the Collective Behavior of Earthquakes to Understand Fault Mechanisms Better. Available at `https://tinyurl.com/EBPhDThesisManuscript`. Supervised by Robert van der Hilst and Michel Campillo.

Education

2021	**Ph.D., Geophysics**	*Massachusetts Institute of Technology*
2016	**Master of Science, Physics**	*École Normale Supérieure de Lyon*
2014	**Bachelor of Science, Physics**	*École Normale Supérieure de Lyon*

Teaching Experience

2023	**Sonic and Visual Representation of Data**	*Columbia University*

Role: Teaching assistant. *Level*: Graduate.
Summary: Introduction to data sonification and visualization in Python.

2022	**Introduction to Statistical Seismology**	*Columbia University*

Role: Guest lecturer. *Level*: Graduate.

2021	**Introduction to Machine Learning in Earthquake Seismology**	*University of Colorado*

Role: Guest lecturer (remote). *Level*: Undergraduate.

2019	**Essentials of Geophysics**	*Massachusetts Institute of Technology*

Role: Teaching assistant. *Level*: Graduate.
Summary: Introduction to seismology, gravity, planetology, magnetism, and geodynamics.

2018	**Physical Principles of Remote Sensing**	*Massachusetts Institute of Technology*

Role: Teaching assistant. *Level*: Undergraduate.
Summary: Introduction to wave physics, Maxwell's equations, and their application to radar methods.

Field Experience

2022, 2023	**OBS deployment at the Axial Seamount**	*Pacific Coast, USA*

Deployment of 15 three-component ocean bottom seismometers (OBS) near the Axial seamount, Pacific ocean off the coast of Oregon and Washington. The goal is to capture the next eruption in detail.

07/2018	**Preliminary passive seismic experiment (FaultProbe project)**	*San Jacinto, California, USA*

Deployment of 400 one-component geophones in two arrays on either sides of the San Jacinto Fault. The project aimed to monitor temporal changes of the P-wave velocity on the fault.

01/2018	Groundwater flow imaging	*Roseau Valley, Saint Lucia*

Self-potential (SP), resistance and gravity survey to map groundwater flow and identify relevant locations for fresh water wells.

2016 - 2020	Diverse subsurface exploration geophysical methods	*New England, USA*

Educational field trips with the SEG Student Chapter of MIT. Training to active source seismic acquisition (2x24 geophones and one sledge hammer), gravity measurements, SP/resistance and magnetometry.

Outreach Activity

Seismic Sound Lab

Link to website: `https://seismicsoundlab.github.io/`.
- June 2023: Introduction to seismology with sonified seismic data to CGEP's Energy Journalism Fellows.
- October 2024: Seismic Sound Lab demonstration at Lamont-Doherty Earth Observatory's Open House.

Invited Conference Talks and Seminars

- ERC TECTONIC / FEAR Seminars on Earthquake Physics, Online (November 2024).
- Massachusetts Institute of Technology, Geophysics Seminar (November 2023).
- Ecole Normale Supérieure, Laboratoire de Géologie (October 2023).
- Los Alamos National Laboratory, Frontiers in Geoscience (June 2023).

Technical and Personal skills

- **Programming Languages:** C, C++, CUDA, Python, Fortran, Shell, Matlab.

- **Parallel Computing:** OpenMP, CUDA.

- **Machine Learning Libraries:** Pytorch, Tensorflow, Keras, Scikit-learn.

- **Super-computer Job Scheduler:** Slurm, OAR.

- Open-source Software Developer (`https://github.com/ebeauce`):
  - `Fast Matched Filter` (`https://github.com/beridel/fast_matched_filter`): Template matching optimized on CPUs and GPUs with Python and Matlab wrappers.
  - `BeamPower` (`https://github.com/ebeauce/beampower`): Backprojection optimized on CPUs and GPUs with Python wrappers.
  - `BPMF` (`https://github.com/ebeauce/Seismic_BPMF`): Complete earthquake detection and location workflow using `Fast Matched Filter` and `BeamPower`.
  - `ILSI` (`https://github.com/ebeauce/ILSI`): Python package for stress inversion.

- **Languages:** French (native), English, Spanish.

Submitted Articles

- **Eric Beaucé**, Felix Waldhauser, David Schaff, Won-Young Kim, Folarin Kolawole. The 5 April 2024 Tewksbury, New Jersey aftershock sequence resolved with machine-learning-enhanced detection methods. *Submitted to Geophysical Research Letters.*

- Folarin Kolawole, Zach Foster-Baril, Leonardo Seeber, Jacob Tielke, Abhishek Prakash, Meritxell Colet, **Eric Beaucé**, Won-Young Kim, Rasheed Ajala, Christine McCarthy, Felix Waldhauser.The 2024 M4.8 New Jersey

Earthquake: Preferential Reactivation of Subtle Immature Rough Faults in Frictionally Unstable Basement Rocks. *Submitted to Geophysical Research Letters*

○ Theresa Sawi, **Eric Beaucé**, Benjamin Holtzman, Fabian Walter, Léonard Seydoux. Array-based characterization of glacial seismicity via unsupervised machine-learning. *Submitted to Geophysical Research Letters.*

Articles in Preparation

○ **Eric Beaucé**. Analyzing the structure of seismic sequences with the occupancy probability: Formalism, models and examples. *Will be submitted to Geophysical Journal International.*

Peer-reviewed Articles

2024
